EnergyVision

REGULATED INFORMATION – Disposal of treasury shares

9 December 2025, 17:45 CET

Ghent, Belgium

PRESS RELEASE

Disposal of treasury shares in the context of the acquisition of Turbulent NV

EnergyVision NV announces that, in the context of the acquisition of Turbulent NV, it has disposed of a total of 41,601 treasury shares in favour of the former shareholders of Turbulent. The shares were transferred in two tranches:

- On 2 December 2025: 36,409 shares at a price of EUR 10.30 per share;
- On 8 December 2025: 5,192 shares at a price of EUR 10.98 per share.

The transfers took place at the closing price of the EnergyVision NV share on the respective transaction dates.

This transaction will result in an increase in EnergyVision's free float – currently 16.4% – upon expiry of the contractually agreed one-year lock-up period.

The total number of EnergyVision shares remains unchanged, as the transaction relates to the transfer of treasury shares previously repurchased.

This transaction concerns the disposal of treasury shares and is being disclosed in accordance with the applicable regulation.

About EnergyVision

EnergyVision is a fast-growing, integrated energy and mobility company, founded in 2014 and active in Belgium, China and Morocco. The company makes the energy transition more accessible and faster by offering solar, wind and hydropower, as well as charging infrastructure, for which customers and businesses do not need to make any investment. At the same time, EnergyVision acts as an energy supplier and links the production of its own solar panels to the consumption of its customers, who benefit from a reduced energy bill, while the remaining electricity generated is supplied by EnergyVision to other energy customers and its own charging points. In this way, sustainable energy becomes widely available and the electricity grid remains stable and reliable. Through this integrated approach, combined with smart, flexible and data-driven management of its own installations and the network, EnergyVision achieves stable growth, technological innovation and a positive impact on the climate, always with the customer and the energy transition as the starting point.
